St Georges Walk Road Closure

On Monday 2nd November, we will be undertaking some ground investigation work at St Georges Walk for a 4-week period. These investigation works will determine the location of existing services, including a combined sewer network, to help inform our scheme design in this area.

In order to safely undertake the work, we require the closure of St Georges Road for the duration of the works, and parking will therefore be restricted. A temporary diversion will be in place as can be seen in the drawing provided.

We apologise for any inconvenience this may cause and appreciate your understanding whilst we carry out these works.
