

Flooding and Rivers Activity Sheets

The Environment Agency help look after the land, water and air.
These sheets tell you about water – especially floods and rivers.

Floods

A flood is when there is too much water on the land, it can cover roads, fields and even houses.

Floods happen at:

Low places near rivers
Low places near the sea

Floods happen when:

There is too much rain or when storms and big waves bring water on to the land from the sea

What do the Environment Agency do?

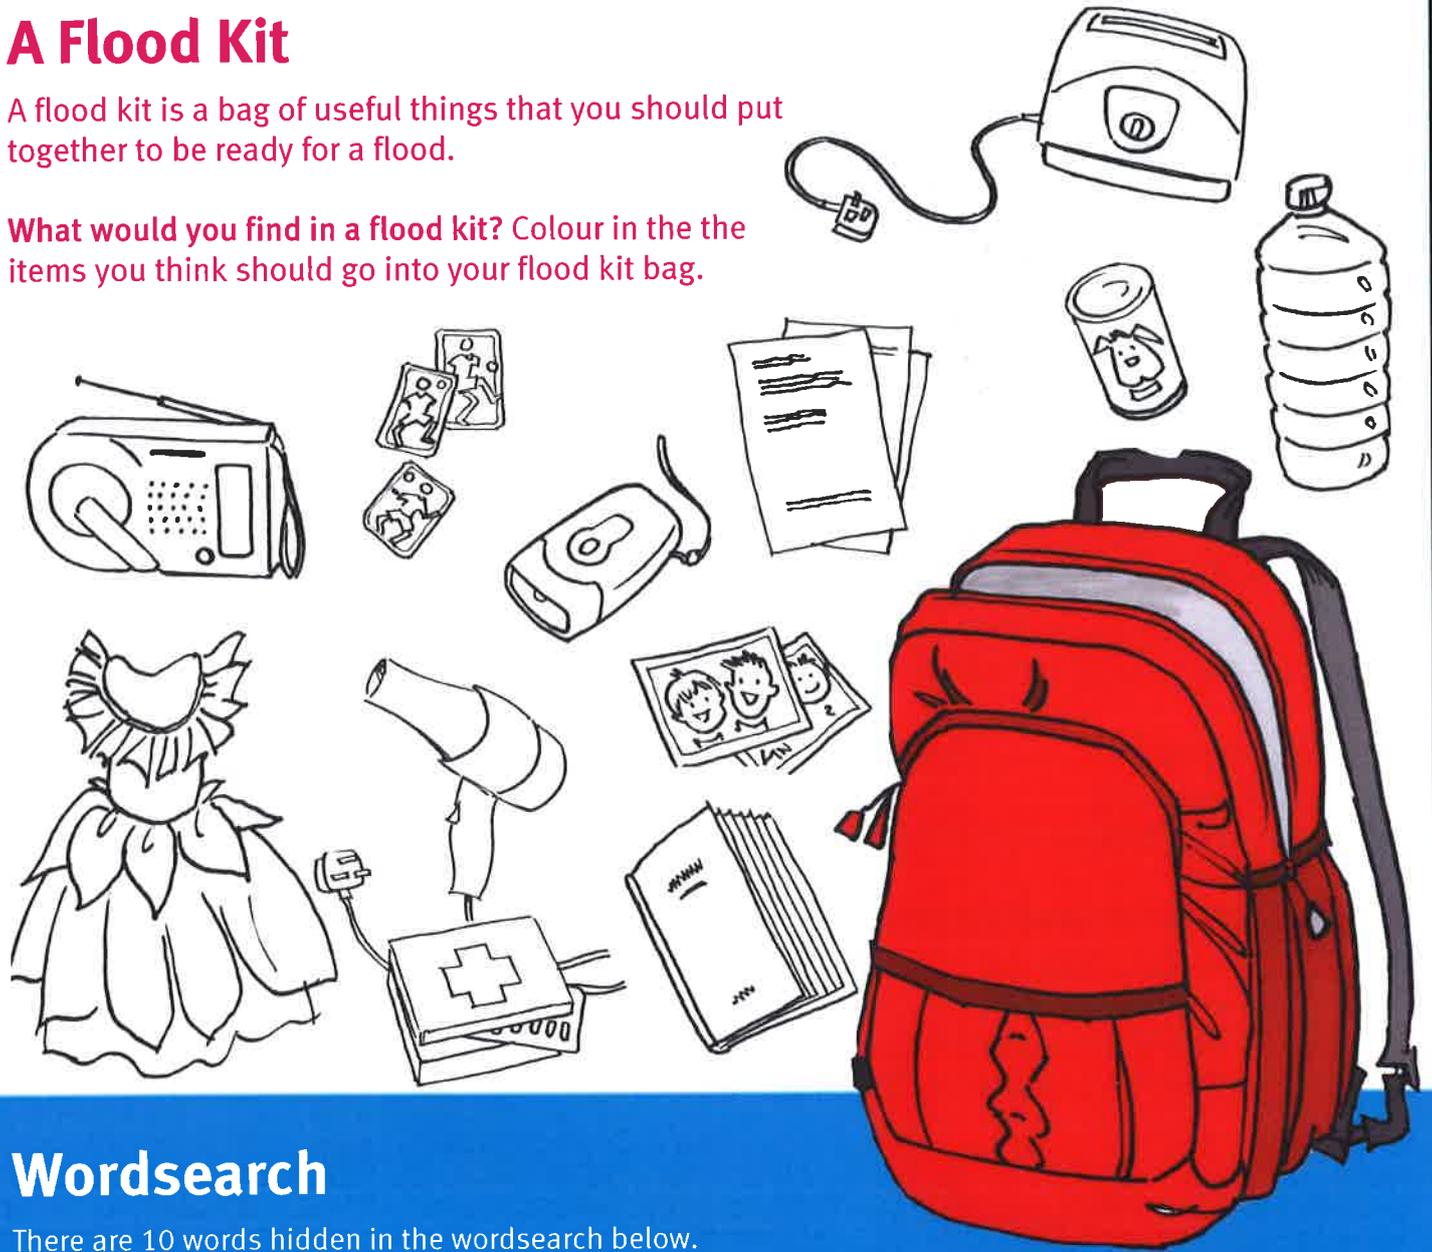

- Watch the weather, rivers and seas.
- Give flood warnings to people.
- Work with the emergency services in a flood (can you think of some?)
- Tell people how to prepare for flooding

A Flood Kit

A flood kit is a bag of useful things that you should put together to be ready for a flood.

What would you find in a flood kit? Colour in the the items you think should go into your flood kit bag.
