

## Caton Road, Lancaster (Phase 3) Flood Risk Management Scheme

**European Union**  
European Regional  
Development Fund

### **Q. When will the cycle path be open?**

**A.** The cycle path is anticipated to open at the end of March, weather dependant.

### **Q. Have there been any delays to the opening of the cycle path?**

**A.** The work has been identified as essential by the government allowing us to continue to better protect the city from the effects of flooding despite the ongoing challenges faced by Covid-19. There has however been understandably some impact on our supply chain, workforce and travel which have caused some minor delays. In addition, we have been faced with challenges from the weather including large amounts of rainfall and snow.

With the additional funding also be secured, we are pleased to announce that we are now able resurface all of the cycle way and install additional health and safety features, which has resulted in the opening of the footpath to be slightly later than originally anticipated.

### **Q. What work is left to complete?**

**A.** The flood defences are now complete, however there is still construction underway to add copings and cladding to the flood defences to improve the health and safety, surfacing of the cycle way and additional landscaping works to undertake.
