

Managing flood risk in Threlkeld

Following a period of heavy rainfall in February 2019 two culverted sections of the Gategill Beck collapsed. Partially blocking the culvert and leaving dangerous and unstable ground around them. To reduce the flood and public health and safety risks from these collapses Environment Agency contractors carried temporary emergency repair work to remove the debris from the watercourse and stabilise the culverts. This was completed in March 2019.

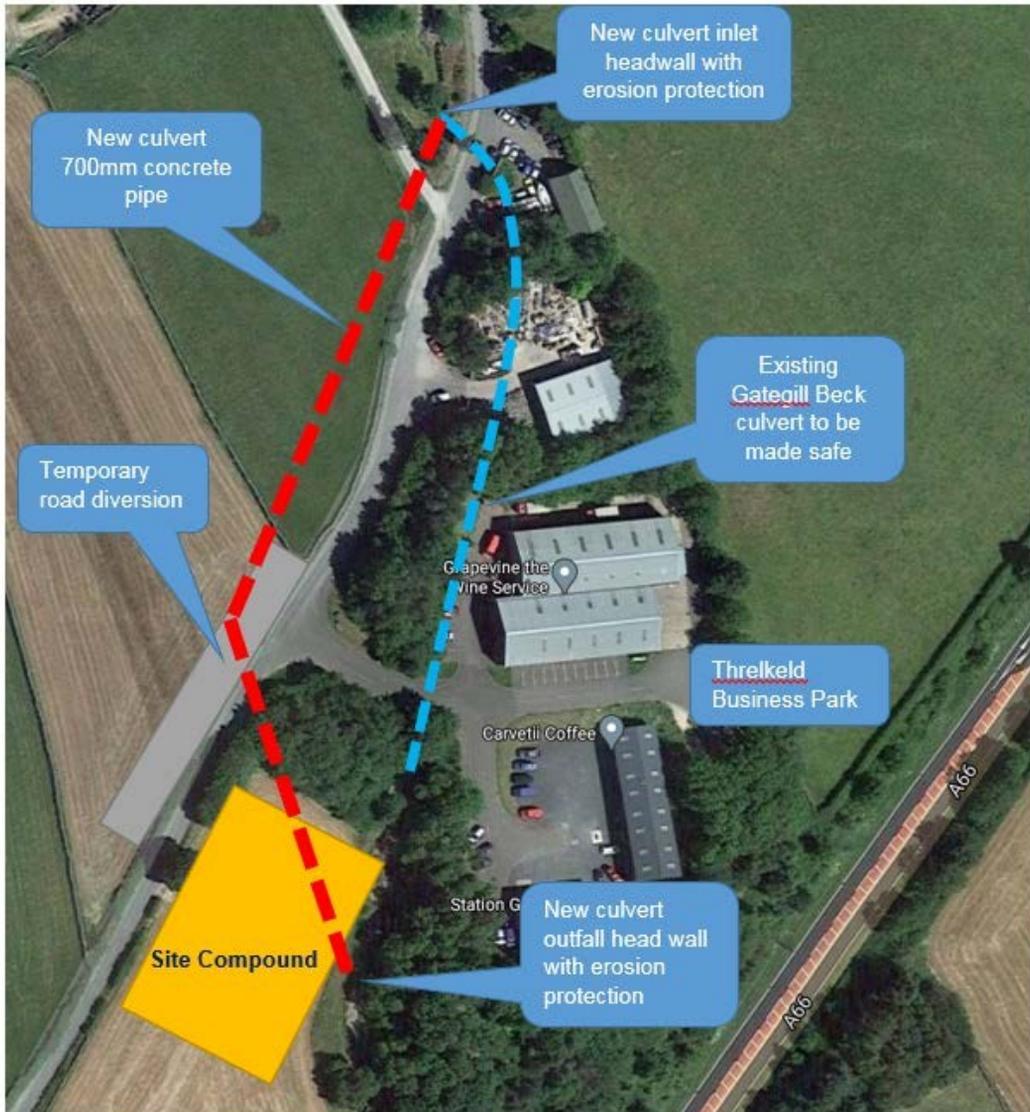

Culvert Replacement Works

The proposed works involve diverting the existing watercourse by constructing a new culvert inlet and head wall and installing a new 700mm concrete pipe in the fields on the North side of Fellside Road. The new pipe will cross the road close to the entrance of Threlkeld Business Park and will outfall through a new headwall into the existing open channel section of river at Town Cross. The existing culvert will then be made safe and be filled in. Some erosion protection work will also be required at the upstream and downstream extents of the new culvert.

When Will Construction Start

Construction work will commence in early May 2021, and will take approximately 8 months to complete. This timeframe will be dependent on weather conditions and river levels.

Plan of the proposed works

How our works will impact you

Unfortunately there will be some traffic disruption to Fellside Road and the access track to Gateghyll. Whilst access will be maintained to properties and businesses at all times, there will occasionally be some minor delays whilst plant and machinery are moving in the area. We have already felled some trees and removed hedgerows in the area so that we could begin the work this spring / summer without disrupting the bird nesting season and other wildlife. The works will be undertaken by our Framework Contractors VBA. They will listen to residents' concerns to accommodate their needs and minimise disruption wherever possible.

Covid-19

The Environment Agency are committed to delivering this Scheme to better protect homes and businesses in Threlkeld and as such we, and our Contractors, are following Government and Public Health England guidance. This is to ensure the safety of the local community and all of our staff.
