

Kendal Flood Risk Management Scheme

Little Aynam

The Environment Agency is delivering a Flood Risk Management Scheme to better protect homes and businesses from flooding in the Kent catchment and improve the local environment and community amenities. The construction of the scheme in Kendal is well underway and we are now making preparations ahead of construction of the flood walls along Little Aynam.

The orange line represents the line of the flood defence wall ■ ■ ■

Along Little Aynam and a small section of Thorny Hills we are constructing a flood defence wall which will be finished in natural stone. The wall will vary in height throughout this section and where required will be topped with railings for safety.

The flood wall will tie into the new entrance wall to Gooseholme Footbridge on Little Aynam. The footbridge will remain open throughout all of our works.

The flood wall is expected to be complete in Summer 2023.

Natural Stone Cladding
