

## Aynam Road Headwall Works - Surface Water Improvement Scheme

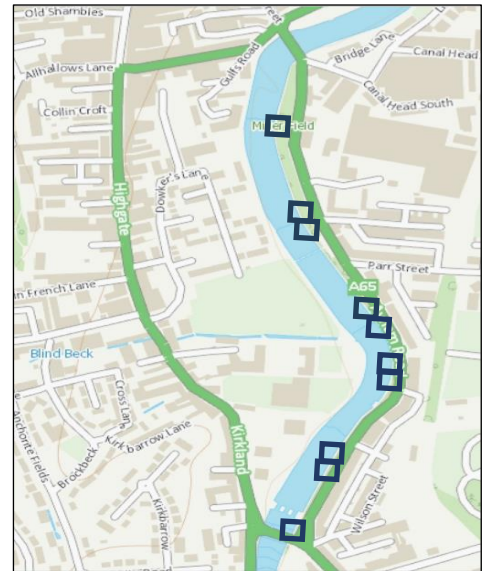

Following the trial hole works which are now complete along Aynam road, we will be starting to remove vegetation along the riverside in locations where we need to construct new headwalls. The headwalls will upgrade the existing surface water outfalls in key locations.

This is part of a £1 Million investment, working with Westmorland and Furness Council to deliver an improved surface water drainage system along Aynam Road.

A riverside lane closure will be put in place along Aynam Road to allow the site team to work safely. These works will be expected to take around 6 weeks and will be due to be complete mid August.
