

# Cumbria Strategic Flood Partnership Workshop

## 19 September 2024 9.00am to 2.30pm

### Carlisle Civic Centre, Cathedral Room

You are invited to participate in an interactive event to help develop how flood and coastal erosion risk management actions are delivered locally.

This event is being hosted and facilitated by Cumberland Council and Westmorland and Furness Council on behalf of the Risk Management Authorities dealing with flooding and coastal erosion across Cumbria.

The event includes a series of workshops to explore:

- The roles and responsibilities of agencies and partners during a flood event,
- The communication strategies before and after a flood event, and
- The steps we need to take to reduce future flood risk including use of natural flood management and innovation to build back better.

Feedback from the workshops will be used to update the local flood risk management strategies across Cumbria, inform a flood risk management communication strategy and provide direction for future strategic decision making.

Lunch will be provided, during which there will be an opportunity to visit exhibits delivered by flood and coastal erosion partners within Cumbria.

**We do hope you can join us.**

Please RSVP and send any dietary requirements by Friday 23 August to: [alison.harker@westmorlandandfurness.gov.uk](mailto:alison.harker@westmorlandandfurness.gov.uk)
