

Kendal Flood Risk Management Scheme

Reducing flood risk in your community

Waterside Update Week Commencing 9th February 2026

Great News!

The tarmacking works on the footpath are now complete, and the footpath is now open again for public use.

The cladding around the flood gate will be completed once the gate controls are fitted along with the railings that are being restored.

We would like to thank everybody for their patience throughout this complex project to construct the new flood wall. It has been a significant undertaking, but the end results look fantastic.
