

River Landscapes: Processes Exercises and Homework

Exercise 1 - Match Up

Source:	The area of high land forming the edge of a river basin
Mouth:	The point at which two, or more, rivers meet
Tributary:	The main path which a river flows along
Confluence:	The point where the river meets the sea
Channel:	The point where a river begins
Watershed:	A smaller watercourse which flows into a larger one

Exercise 2 - Label the diagram

Using the correctly matched up terms above, label the components on the diagram here:
