Volunteer as a member of your local flood and coastal committee

Regional Flood & Coastal Committees

- **Do you want to help us manage the increasing risk of climate change?**
- **Do you want to make a real difference in your community?**
- **Do you want to learn new skills, gain experience and build a great network?**

.....if so, we want to hear from you

Put simply, we help protect people, homes, and properties from flood and coastal erosion, and support communities to adapt to the effects of climate change.

Our 12 committees together cover the whole of England. We're made up of elected members who represent the views of local authorities, and independent members from a wide range of backgrounds.

Our members help us:

- represent the views of local communities in how we manage flooding and coastal erosion
- make communities more resilient and able to adapt to the challenges of a changing climate
- approve the programmes of work that better protect the homes and livelihoods of hundreds of thousands of people
- create the local partnerships that pay for, build and manage the projects in our programmes

Our members are vital to our success

Environment Agency

We're recruiting for new independent RFCC members across the country right now.

We welcome applications from talented and enthusiastic people from all backgrounds. It's vital that RFCC members represent the true diversity of the communities we work with.

You don't usually need formal qualifications for these roles. It's your enthusiasm and commitment to your local community that is most important.

You'll be expected to attend regular RFCC meetings and prepare by reading papers in advance.

The overall commitment is typically around 12 days per year. This may vary between RFCCs and depends on any additional responsibilities you undertake
